 Mad

Would have liked more work with test tools prior to diddling and daddling with Databases and Vue components.

more work on relevant and popular testing tools that we will use in the future

Are we writing tests, or software?

Never seen before framework

 Sad

Unclear goals

Could have used another sprint

 Glad

Monday is good

Good communication, as always

Shit got done

teamwork and that we set up for each other

Rewriting the US to TD's was quick.

Easy to understand User Stories
